

Irfana J

Data Analyst

+8608636119 — irfanajahabarali@gmail.com
github.com/irfanajahabarali — irfanportfolio.vercel.app

Profile

Data Analyst with a strong interest in working with data by collecting, processing, analysing, visualizing and communicating insights through practical projects and dashboards, with a continuous focus on learning and improving analytical skills.

Skills

Data Analysis: SQL, Excel, Power BI, Python

Excel: Pivot Tables, Pivot Charts, Data Cleaning, Dashboard Design

Tools: Git, GitHub, Canva, VS Code, Microsoft Word, Microsoft PowerPoint,

Web: HTML, CSS

Projects

Pizza Sales Analysis SQL, Excel

- Analysed pizza sales data using SQL and Excel to identify revenue, order trends, product performance, and top-selling pizzas.
- Analysed sales by day, month, category, size, and pizza to generate meaningful business insights.

Project Management Excel Dashboard Excel

- Created an interactive dashboard using Pivot Tables and Pivot Charts to organise and visualise project management data.

Aavin Milk Company Analysis Python, Jupyter Notebook

- Analysed Aavin-related data using Python and Jupyter Notebook to clean data, identify patterns, and generate analytical insights.
- Applied the workflow: Collect → Process → Analyse → Visualise → Communicate Insights.

Personal Portfolio Website HTML, CSS, GitHub

- Created a personal portfolio website to showcase projects, skills, education and professional profile.

Academic Projects

Novel Approximate Floating-Point Adder with Runtime-Tunable Precision

- Designed and simulated an approximate floating-point adder architecture focused on reducing power consumption while maintaining acceptable computational accuracy.
- Explored runtime-tunable precision to balance accuracy and power efficiency.

Diabetic Foot Ulcer Detection and Classification Using Image Processing

- Developed a MATLAB-based image processing system for detecting and classifying diabetic foot ulcer images, focusing on wound image analysis and automated assessment support.
- Image Input → Preprocessing → Enhancement & Filtering → Segmentation → Morphological Processing → Detection → Classification.

Education

B.E. Electronics and Communication Engineering 2026
Hindusthan Institute of Technology CGPA:8.97

HSC 2022
Sri Avinashilingam Girls Higher Secondary School 82%

SSLC 2020
Sri A. Ramasamy Matric Higher Secondary School 85%

Certifications

- Circuit Voyage Workshop, Sri Krishna College of Technology (2024)
- 5G Networks – ICT (PMKVY) Certification (2024)
- Paper Presentation on Energy Storage Innovations and Power Electronics for EVs and Smart Grids
